Onderwerp: HE Team Update

Dear colleagues,

Here is the team update for this week.

GENERAL ANNOUNCEMENTS

- **HE Staff Meeting:** The presentation slides of the Staff Meeting have been added to [the website](#). Following Elske's follow-up from 29-5, please find some key points from the meeting below:
 - Supervisors and promotor of PhD candidates should be aware that the Go/No go forms are carefully and fully completed. A good rule of thumb is that it should be understandable to someone who was not present at the meeting. Lastly, the form should be sent *by the supervisor or promotor* to the department chair via Dept-Chair-HE@tudelft.nl.
 - If you have a HE Highlight that was not included in last meeting, please send it to us so we can include it in a future meeting.
- **Dutch Language Pilot:** A reminder that the [Dutch Language Pilot](#) is now open for enrollment (permanent staff only). Please be aware that we would like to inventorize all interested participants before summer (but no need to start right away!)
- **Local Sustainability Coordinator CEG:** CEG is looking for a new Local Sustainability Coordinator now that Marc Ottel  has become TU Delft Sustainability Officer. The role is 0.1–0.2 fte and is aimed at an assistant or associate professor with affinity with sustainability and strong communication/stakeholder engagement skills. If you are interested in being put forward, please let Tiziana know by the end of this week. For more information, please see Tiziana's mail of 1-6.
- **Haskoning Innovation & Education Fund:** The first call for project proposals for the Water Technology & Delta Resilience programme is open. The programme can typically support 3–4 PhD projects, or a mixed portfolio of PhD/Postdoc/EngD projects. Proposals should focus on either contaminated sludge-to-resource or system-level water quality and resilience under change, and must include interdisciplinary collaboration between BT/EBT, WM and HE. The submission deadline is 19 June 2026. For more information, please see the mail from Mario, Merle & Tiziana of 26-5.

TOPIC OF THE WEEK - HE lab visit of Ingrid Thijsse

Ingrid Thijsse visited the HE lab on 21-5. The programme showcased a broad range of HE activities and facilities, including Floating Future, iWOS wave overtopping tests, the tilting flume, DTPL, Cubipod tests for IJmuiden breakwaters, Rifherstel-XL, sediment analyses and fieldwork infrastructure. Many thanks to everyone involved in preparing and presenting the lab visit.

Met vriendelijke groet / Kind regards,

Elske & Jelle
